- 1) My wife and I are local Far North ratepayers, 45 Tokerau Beach Rd, we agree with the lease so a new fire station may be built.
- 2) I support the 33 year lease for the fire department, however as flat community recreational space is limited in the area and the nearby community growing, I suggest that the access to the rest of the recreation area is kept fully open for the public (in accordance with the Act for recreational reserves). It would be great if some public play space was developed for youth and their caregivers there.
- 3) An improved fire station is needed by the expanding community. It is a safety thing.
- 4) I own a bach in the area and support the fire station and their needs. The area is at high fire risk and I want them to have whatever infrastructure they need to support their fire fighting efforts.
- 5) The community needs to be supported by an updated fire facility given the constant high fire danger of the peninsular. The fire station is also a community hub which brings pride to Whatawhiwhi and the wider community.
- 6) Because they provide essential services and deserve a flash new building in my opinion! I'm very happy to hear this is in the works. Aroha mai I cannot meet in person, but I'm sure a rep from my Wi-Kaitaia or Stephens whanau will be there.
