

### Petition for Speed Humps on Hillcrest Road in Kaikohe

Reason for requesting speed humps:

We need to slow down the increasing amount of speeding traffic travelling on Hillcrest Road. Hillcrest Road seems to be used as part of a racetrack and as they proceed on Hillcrest Road the speed increases toward the end.

With this speed it would be impossible to break in time if a child or animal would cross the road.

Near misses have been observed were children played on their property and balls have rolled onto the street and there is no time at all to get to safety when you hear the fast cars approaching.

Police are patrolling the streets occasionally however this does not seem to have any effect on the speedy drivers.

Power poles have been knocked over due to loss of control of drivers on this road.

It is scary to think we could lose a loved one when there is the possibility of preventing this all together.

Thank you for your proactive support.
