Kia ora Selina

Addressing standards AS/NZ 4819 were adopted and put in place in 2011. The existing use of “Heights” as a road type would be a result of naming policy prior to this.

In the guidelines attached page 23 (last page is 24) contains the entire Appendix of applicable road types. This is the most up to date Appendix as contains “Ara” and “Te Ara”

Heres a screen snip of the Appendix pages. Often in cases where “ Heights” has been submitted and rejected “Rise” is used instead.

## Appendix A: Road types for use within in-fill developments

Road types that are applicable to in-fill developments should be selected from the table below. The abbreviations listed should only be used for signage. This list only includes road names from the Standard that are suited to in-fill developments. It has also been extended to include Maori road types. The road type should be selected from those specified as available for either open-ended roads, culs-de-sac, or pedestrian roads, as applicable.

Kia ora Richard,

Can you please send me the full documents please as this goes up to Page 25 or the snippet showing this as we have roads in the Far North that have 'Heights'. For example; Access Height and Kotare Heights which are public roads.

If this has always been, can you please tell me why those other names were accepted and if that was recently changed, can you please advise when this happened?

Thank you,  
Regards,

Thanks for the email Selina

Unfortunately "Heights" is not a valid road type as part of the AS/NZS 4819:2011

Ive attached a copy of the infill guidelines which include the Road types valid on page 51

Hope this helps

Kind Regards  
Richard
