Community Issues

| Issue name | Comment |
|--|--|
| Roads / Pawarenga/ Mangataipa/ Iwitaia Mitimiti/Motuti / Tutekehua/ West coast Road – Skyline Hill, Broadwood. | The road issue in North Hokianga is enormous. The road Maintenance for North Hokianga roads has slipped somewhere along the line. This is a huge issue for our people as we have to face this issue on daily basis, it is not fair on our people that we put up with this issue that should be maintained by council. These roads are “our highway”. |
| Footpaths | Footpaths in Kohukohu & Pangaru around the village/ Church st/ Marriner st/ Potter st / Yarborough st/ Tautoro should be implemented for our people because there are no paths for our people in these areas to walk other than the road. |

| | |
|-------------------------------|--|
| Drains | The Drain/Culvert Maintenance for North Hokianga roads is not good enough. This is a huge issue for our people as we face this problem on a regular basis. The drain build up on multiple roads in North Hokianga cause floods and damage to the roads, which causes issues for us as here in North Hokianga due to lack of Maintenance. |
| Speed Change/ and speed bumps | <p>This issue was brought to my attention that there should be a speed change from the recycle centre in Kohukohu to at least 60 or 50 due to safety of events and tangi that is being held in this area.</p> <p>Speed bumps should be put in place before the school and around the school as well - to slow down oncoming traffic for the kid's safety. There should also be speed bumps be put in place before the shop just after the Hotel to keep traffic flow slow.</p> |
