Date To: 21/10/2024

Meeting	Title	Resolution	Notes
		<p style="text-align: center;">land disposal in which mana whenua are to be included.</p> <p>b) request that the preliminary designs are to be completed prior to December 2023, to enable the Long Term Plan engagement process and request staff report back to the Infrastructure Committee to present the findings of the preliminary design reports.</p> <p>c) request staff seek replacement resource consents for discharge of treated wastewater to water from the Kāitaia and Kaikohe Wastewater Treatment Plants and that during the term of the consent, staff progress investigation of disposal to land options for both the Kāitaia and Kaikohe Waste Water schemes.</p> <p>d) request a treated wastewater disposal to land workshop be scheduled for late 2021 with the Infrastructure Committee, which will cover methodologies and processes associated with establishing a disposal to land scheme.</p> <p>That the Infrastructure Committee recommend to Council that expenditure of up to \$330,000 to cover both the Kāitaia and the Kaikohe sites, is allocated in the Long Term Plan deliberations, to complete a preliminary design for each Wastewater Treatment Plant, and sufficient staffing resources are assigned to enable ongoing engagement with mana whenua and other stakeholders.</p> <p style="text-align: right;">CARRIED</p>	<p>For both of these projects, the OPEX funds allocated no longer exist as they were allocated in a previous financial year. However, wastewater discharge to land investigations in Kaikohe have progressed significantly, consultants are currently finalising a concept design and high level cost estimate for conveyance and discharge of treated wastewater from Kaikohe WWTP to a site located at 80A Jordan Road, which is on the market. Staff are also investigating the option of expanding the discharge scheme into Pamu Farms land adjoining 80A Jordan Road, should additional land be required. These investigations have been carried out as part of the Kaikohe WWTP Working Group formed with Nga Hapu o Kaikohekohe and includes investigating and recommending required upgrade of the Kaikohe WWTP. Staff and Nga Hapu o Kaikohekohe are planning to present these findings to elected members via a workshop and subsequent report in the coming months. , Regarding Kaitaia wastewater discharge to land investigations, initial sites of interest (where landowners expressed an interest in receiving treated wastewater) are located in Ahipara Takiwa rohe. Since late 2022 staff have been meeting with (and formed a working group with) Ahipara Takiwa reps to investigate required immediate upgrades to the Ahipara WWTP (to enable the WWTP to start complying with conditions of consent authorising discharge of treated wastewater into water) and to investigate wastewater discharge to land options for both Ahipara and Kaitaia. The priority for this working group has been to determine immediate WWTP upgrades, these were recently finalised and now the group is focusing on the wastewater discharge to land options investigation. During that stage of works, the group will review the sites of interest for Kaitaia WW discharge to land, and will consider any other suitable sites that could receive a combined flow from Kaitaia and Ahipara.</p> <p>08 Jul 2024 2:18pm Action reassigned to Proctor, Tanya</p>
