

Appendix: Kerikeri reserve classification

1. Council properties adjoining wall - 16 Butler Road shown in blue and reserve in yellow

2. Reserves assessment

Identified functions of reserve:

- + **stormwater drainage** – overland flow down gully, underground stormwater pipes, also underground sewer pipes and vehicle access to sewer pump station on adjoining local purpose reserve to south
- + **walking access** – off-road access from Kerikeri Road to recreation reserve on Aranga Road
- + **recreation** associated with adjoining recreation reserve to south including section of walkway

Assessment:

Stormwater functions cannot be removed from this reserve as the boundaries contain a gully and overland flow path, and this is assessed to be the primary function of the reserve. The eastern third of the reserve does not have a drainage function and the primary function of this area is assessed to be walking access. This area also includes an access easement for trucks exiting the Woolworths site.

The primary functions of the reserve are assessed as being drainage and access, and the appropriate classification as **local purpose reserve – drainage and access**

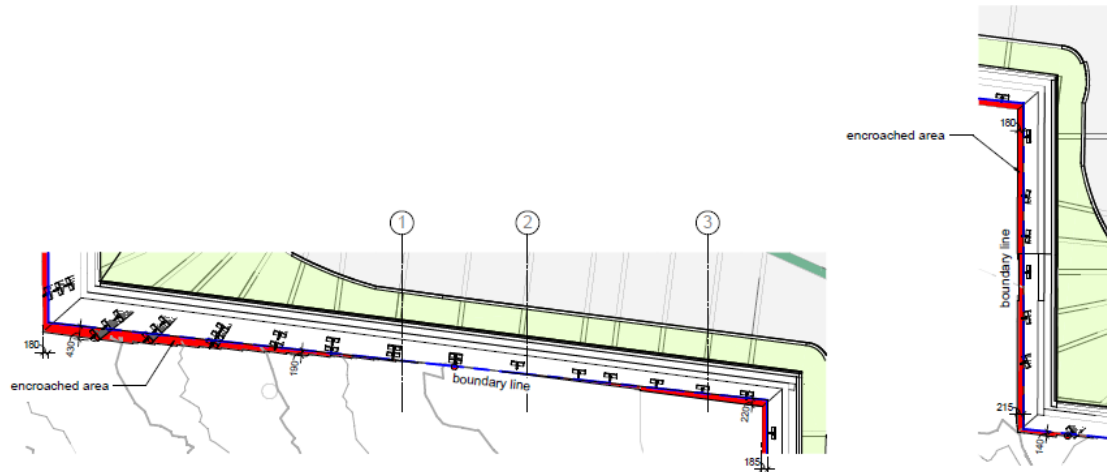

3. Retaining wall to be legalised by boundary adjustment

Encroachments across boundary of Lot 6 shown in red – maximum width 290mm:

Encroachments across boundary of reserve Lot 10 shown in red – maximum width 430mm:
