Issues

- Actions re RFS on Rarere Terrace after ratepayer contacts CEO office
- Still no response re RFS on Mission Road
- Awaiting notification re Winsor Landing. Is FNH proceeding, when will it be completed
- Concerns that we as Community Board are not being provide with all information re some of our deliberations. Various parties, when not in agreement with Boards decisions, appear to undertake “lobbying” to achieve a different result
- Despite staff and elected officials agreeing on resolution of bus stop and parking it again appears that contact by interested parties will place the issue on the table again
- Growing concern as to WHO is controlling various tourism issues in Northland??
- Continued concern in regard to the income from Cruise Ships and the potential damage to the core tourist income sectors e.g. Accommodation, Food.
 - o Cruise Ships paying well below NZ minimum wage not fair competition for local business
 - o Will make formal request for information as to income from Cruise Ship industry (not estimated spent of passangers)
- Bus tours should be reviewed as to income, jobs created and the use of public funded facilities.

- I believe that various parties are making decisions based solely on commercial interests that effect our communities, and we should take a more holistic view of proposals.

Resource Consents

- Only three consents reviewed, the process still appears to be less than effective from the point of view of Community Board review
- Note interest in consent regarding Kerikeri Cruising Club

Requests for Service/Information

Email send to the CEO's office regarding RFS system

In progress

- The Domain Plan Management Plan
- Bus Stop and Parking Kerikeri
