Cherry Park House is a facility owned by the Council and run by the Cherry Park House Management Committee in accordance with their constitution.

The new committee , (established in July 2018), has identified the need for a more efficient and economical form of heating for the various rooms used for activities of community user groups.

Currently user groups use small 2000watt fan heaters to heat the rooms. These are inadequate for heating as well as being inefficient power wise and at times dangerous (prone to being knocked over).

An analysis of the various forms of heating identified that suitably sized heat pumps would be the most efficient and economical solution.

Cherry Park House is currently used by 17 user groups (in excess of 200 members) at various times of the day and night throughout the year. The facility has recently been upgraded and is an valuable asset for furthering Art in the district. Activities include Art Lessons, Art workshops, Community Art Groups meetings and many other events.

Research has found that user groups are reluctant to use the facilities in the colder months due to the poor heating currently available.

More efficient heating would allow:

- Community groups to be warmer and healthier when using the facility.
- Encourage other user groups to use the facility in colder times and interact with each other to create a vibrant and active Art community.
- Increase the use of the house by creating a warmer environment thereby making a more sustainable art community facility.
- Cherry Park House is a valuable facility producing quality outcomes in both learning and art products that directly assist the community in growing Art in our district, increased use by creating a healthy environment can only increase these outcomes.
- Use less electricity and reduce power wastage making the facility more sustainable by helping to keep costs down.
- Create a safer environment not subject to accidents connected to the existing heaters.
- More environmentally friendly and economically sustainable alternative.
