**Community Matters**

*This section should be completed for matters arising within the community, which Council need to be aware of. It could be related to ongoing projects, requests, feedback etc.*

Topic	Comment
-------	---------

<p>Extensive Roothing problems and flooding</p>	<p>Have received numerous complaints of flooding and roads failing and visited a number of local roads. Most of these roads show poorly maintained water tables and culverts that are blocked or too small to cope with the water volumes. Below is an example on Waitāheke Road, south of Kaikohe, of badly eroded road and erosion around the culvert.</p> 
<p>Flooding</p>	<p>Flooding on Recreation Road, Kaikohe. The area floods regularly; the storm water funding allocated needs to be spent urgently as this storm water problem also causes a traffic hazard on the heavy traffic bypass when it floods.</p> 

## Cumber Road

Cumber Road, Kaikohe, is used by Council vehicles discharging at the Kaikohe sewerage plant, by local farmers and residents as well as contractors at the old DSIR site. The road is slumping and needs water tables cleaned. The biggest issue is the bridge that floods 3 to 4 times a year with the last flood seriously eroding both ends. Immediate attention is needed and a better fix is urgent.
