Other Fees and charges comments (via the Annual Plan submission process)

- We support the proposed changes to Fees and Charges based on the "user pays" principal. We are also still strongly in favour of re-introducing Development Fees to ensure Developers pay for the impact on infrastructure.
- Re the Fees- Resource Consent hourly fee makes sense to me. Building Consent should be a fixed fee in my opinion.
- The proposal for Resource Consent fees and charges increase is not in line with the private sector or the actual costs for hourly processing charges. The shortfall will need to be absorbed into the general rates or obtained through other fees. In my opinion private development should be self-funding. The hourly processing charges for the Resource Consents are 10-30% lower than what they should be. This creates budget pressure in these areas and resourcing issues.

The charge out rates are not equitable across the schedule. A clear example is the comparison of rate charges between the Building consent and Resource consent fees. A Resource Consent Engineer is proposed to be charged out at \$190/ hour and a Development engineer proposed to be \$265/hour effectively similar roles. I declare that I am an employee of Far North District Council in the Resource Consents team.

• Yes. Stop tripling the costs of council fees. I've recently learned that the Resource Consent fee has increased from \$1750 to \$4900 in under 3 years. This is OUTRAGEOUS and completely unexplainable.
